

Product Data

pH Adjuster™ 400

pH Adjuster for water based metalworking fluid

Description

Castrol pH Adjuster™ 400 (previously called Balancer P3) is an amine based pH booster that is free of inorganic salts. It can be used in single sump machines as well as central systems.

Application

pH adjuster 400 is recommended for use in water soluble metalworking fluids where the pH has dropped below the recommended level. The additive will also improve the buffering capability and corrosion protection of the system.

Conditions of Use

pH adjuster 400 should only be used upon recommendation of Castrol's Service Representative. Recommended concentration is between 0,1 - 0,2% depending on the pH drop.

Typical Characteristics

Appearance = Clear

Density at 15 °C, kg/m³ = around 975

Storage

To avoid product deterioration, keep the container/drum tightly sealed always. Prevent any frost and water ingress. Store it in a cool and dry place away from direct sunlight. It is preferable to store the product indoors always. For more details, please refer to the product safety data sheet.

This product was previously called Balancer P3, The name was changed in 2015.
