

TEXCLAD[®] 2

PRODUCT DESCRIPTION

Texclad[®] 2 is a calcium-based grease that resists washout and provides good film strength and load carrying capabilities.

CUSTOMER BENEFITS

Texclad 2 delivers value through:

- **Water tolerance** — Resists washout, even when subject to gross water contamination.
- **Excellent adhesiveness** — Provides good film strength in both wet and dry environments.

FEATURES

Texclad 2 is a calcium-based grease, which contains special friction modifiers such as molybdenum disulfide and graphite. These modifiers help create a long-lasting film on working surfaces. Texclad 2 has good load carrying capability and is very resistant to water washout.

APPLICATIONS

Texclad 2 is recommended:

- for ball mill gears, traveling water screens, and fork lifts.
- for chain and sprocket lubrication and as a tenacious fifth wheel lubricant.

TYPICAL TEST DATA

Product Number	277116
SDS Number	24159
Operating Temperature, °C(°F)	
Minimum ^a	-18(0)
Maximum ^b	79(175)
Penetration, at 25°C(77°F)	
Worked	280
Dropping Point, °C(°F)	99(210)
Thickener, %	9.0
Type	Calcium
Viscosity, Kinematic*	
cSt at 40°C	1000
cSt at 100°C	36.8
Texture	Tacky
Color	Black

a Minimum operating temperature is the lowest temperature at which a grease, already in place, could be expected to provide lubrication. Most greases cannot be pumped at these minimum temperatures.

b Maximum operating temperature is the highest temperature at which the grease could be used with frequent (daily) relubrication.

* Determined on mineral oil extracted by vacuum filtration.

Minor variations in product typical test data are to be expected in normal manufacturing.

Product(s) manufactured in the USA.

Always confirm that the product selected is consistent with the original equipment manufacturer's recommendation for the equipment operating conditions and customer's maintenance practices.
