

TECHNICAL DATA SHEET

SYNTHETIC & SYNTHETIC BLEND 4-STROKE SxS ENGINE OIL

Synthetic SAE 0W-40

Part # 11200, 11201, 11202, 18046, 11203

Synthetic SAE 5W-50

Part # 11208, 11209, 11210, 18048, 11211

Synthetic SAE 10W-30

Part # 11204, 11205, 11206, 18047, 11207

Synthetic SAE 10W-50

Part # 11212, 11213, 11214, 18049, 11215

Synthetic Blend SAE 10W-40

Part # 11196, 11197, 11198, 18033, 11199

Lucas Oil's Synthetic and Synthetic Blend 4-Stroke SxS Engine Oils are a line of products in the most common SAE viscosity grades recommended by SXS manufacturers. These high-performance, all-temperature and all-weather-ready engine oils are recommended by Lucas Oil for use in side-by-side (SxS), ATVs, UTVs and virtually all off-road recreational vehicles.

Lucas Synthetic SxS Engine Oils are suitable for use in all popular SxS makes and models including Polaris, Kawasaki, Honda, Arctic Cat, Can-Am, Yamaha and more. Lucas SxS Engine Oils are blended with high-quality synthetic base stocks (Groups IV, III, II), premium additives and shear-stable viscosity modifiers to provide unmatched performance. Formulated and proven to provide premium lubrication, resist oxidation, exhibit improved cold-weather fluidity and stay-in-grade viscosity, no matter how much the oil is sheared. Premium dispersants and detergents keep engines clean and free of deposits.

Side-by-Sides and other off-road vehicles represent some of the harshest driving conditions possible. They run all-out, under grueling conditions, which is why Lucas Oil brings our race-proven tradition of engine oil formulation to consumers everywhere. Suitable for both weekend warriors and experienced competitors, Lucas Oil SxS Engine Oil is the right choice for any off-road vehicle.

Lucas 4-Stroke SxS Engine Oils are available in one-quart and one-gallon containers in five different viscosity grades: **Synthetic SAE 0W-40, SAE 5W-50, SAE 10W-30 and SAE 10W-50, and Synthetic Blend SAE 10W-40.**
