NANO PRO MT®

MILITARY TESTED MILITARY TOUGH

12:1 NANO COOL™ - UPGRADE YOUR COOLANT. PROTECT YOUR INVESTMENT.

Part # NDT128NC (128 oz. Bottle)

Cold blooded heat killer. Fed up with heat damaging your equipment. Nano Cool™ has you covered.

Works with all antifreeze types (yellow, green, red, orange glycol or OAT) .

Operational Test Results

- Lowers coolant temps by up to 15˚ F.
- Decreases fan usage, reduces parasitic loads on engines to improve efficiency.
- Will last the life of the coolant. Nanomaterials never wear out like chemical surfactants (“wetters”).

Protects your investment.

- Cuts maintenance costs and extends life of equipment.
- Built for heavy use.
- On-highway, off-highway, stationary or mobile applications.

Proven in open wheel and stock car racing, ideal for large industrial engines, high load systems and gensets.

Also available in 16oz. (NDT16NC) and 50:1 format (NDT128NCC50).

Part # NDT128NCC50

ENGINEERED & MANUFACTURED IN THE USA

Nano Cool the first coolant additive powered by mechanical Nanotechnology. Nano-sized materials in deionized water to deliver unmatched heat displacement—cooling engines faster and more efficiently than anything on the market. No chemicals to fade away. No heat related breakdowns. Just long-lasting protection that outperforms traditional coolants. Less heat = Fewer heat related failures. More Uptime = Higher Profitability.

Nano Pro MT – Built for industrial performance. Ready when your machines are. Cool Smarter. Run Longer.
