

Mystik[®] Cotton Picker Spindle Cleaner

OVERVIEW

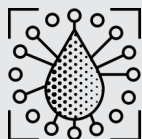

- A water-soluble oil-based concentrate that easily mixes with water to form an emulsion that cleans contaminants and debris from cotton picker spindles.
- Non-staining, non-flammable (when mixed with water) formula protects equipment without washing away the spindle grease.

FEATURES & BENEFITS

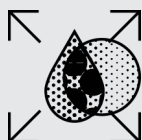

- Emulsifies well, even in hard water.
- Non-flammable when mixed with water.
- Cleans cotton and sticky residue off of spindles and moving parts.
- Extends service life of doffers and pads.

APPLICATIONS

- Designed to protect equipment and keep it running longer by preventing rust, extending the service life of moisture pads and doffers, and lubricating and coating the spindles to keep them from becoming entangled with sap and plant material. Doesn't wash away spindle grease like soap and water can.
- To get the full benefit of this protection, follow these recommendations:
 - Starting dilution is recommended at 70 gallons of water per 1 gallon of Mystik Cotton Picker Spindle Cleaner (treat rates may vary depending on water hardness).
 - The water/cleaner emulsion is designed to last greater than 72 hours without further mixing, but agitating is still recommended if the product sits for an extended period of time.

PROPERTIES

Typical Properties for Mystik Cotton Picker Spindle Cleaner:

Material Code	663640002
Gravity, °API ASTM D4052	22.9
Pounds/Gallon @ 60°F	7.6
Flash Point, COC, °F (°C) ASTM D92	338 (170)
Viscosity ASTM D445, cSt at 40°C	23.1
Emulsion Characteristics 70:1 in water, Break time, hours	>72
